

The Kenton Pro-2000 MkII Editor requires Max or Max-Runtime (OsX or Windows) which you can download at <http://cycling74.com/downloads/>.

A help file (picture below) can be found in the "Menu" - besides the Presets.

Apart from the fact that i can't see any possibility of arranging destruction with this software, i want to point out that you are using it at your own risk.

Enjoy!

Presets:
Blue = saved preset
Cyan = active preset
Grey = empty preset

Recall = click
Save Preset = Shift click

Presets

MIDI-Port

Menu

This Editor does not receive data from the Kenton Pro-2000 MkII. Therefore it has no Dump request.

When a (single) Preset is recalled in the software the settings will be dumped to the Kenton Pro-2000 MkII.

To save the settings inside the Kenton Pro-2000 MkII hardware please use the hardware-buttons.

To save all software-presets permanently click "Menu" and follow the instructions.

The file "KentonPro2k.maxpresets" will be loaded as the default preset file and needs to be in the same folder as the editor.

The other file located in the folder is "KentonProMIDI.maxpresets". This file keeps the MIDI-Prefs. When the (yellow) MIDI-Port address is changed the software will save the new address setting automatical.
